Biography – Stefan Beck

Stefan Beck is a senior software architect und project manager with CyTRAP Labs GmbH, which provides corporate governance and social media services to organizations worldwide.

Stefan Beck brings 5 years of experience as a software developer and architect in a range of software projects. He is an expert in:

- OO Software Development (C/C++, Delphi, Java)
- OO Design
- Web Programming (PHP, Apache, MySQL)
- Network Programming (Client – Server architecture)
- Embedded Software Development (Win CE)
- Requirement Engineering

He has been involved in several software projects dealing with security, mobile applications and highly flexible workflow engines.

In the past, he was the leading developer and software consultant for CASEScontact - the Information Security Portal for Europeans.

He got his BSc. in information technology from the Berufsakademie in Horb, Germany and a Master of Science in digital media from the International School of New Media at the University of Lübeck.

Besides being native German speaker, he is fluent in English.
